

Sts'ailes and Scowlitz First Nation and the department have agreed to amend and extend the licence on the Chehalis River commencing Thursday Aug 12<sup>th</sup> to Wednesday August 19<sup>th</sup>. Details are below

Bullets you can use to inform your organizations.

- Date: Thursday Aug 12, 2020 to Wednesday August 19, 2020 (Daily)
- Time: Daylight hours only 0600 hours to 2100 hours
- Gear: Hook and Line, Spear or gaff
- Area: Those waters below the Canyon Pool to the confluence of the Chehalis River at the Harrison River, downstream of the logging bridge 2.4 km downstream of Chehalis Lake, including tributaries to that part to the hatchery outlet
- Target Species: Chinook (retention)
- By Catch Species: Summer Run Steelhead (Non Retention) No other Salmon expected at this time
- Monitoring: Sts'ailes will provide a monitor for the FSC fishery and also collect recreational creel data
- Enforcement: C&P and RCMP have both been involved in supporting the fishery and the monitors and will have presence on the fishery.
- Collaborative work is being designed to enhanced data collection (DNA, CWT, time of encounters, etc).
- Ongoing dialogue between DFO, First Nation and the Recreational community.
- Expectation is to continue to plan similar fisheries moving forward, including presence of RCMP and DFO C & P.
- The fisheries will be monitored and reported on daily and all catch reports submitted 24 hours after the fishery is over.
